

EVA+

With a soft, rubber-like texture and excellent shape retention, this filament allows clinicians and technicians to create highly conforming, patient-specific components with superior cushioning and durability.

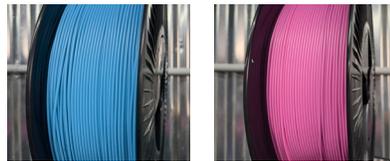

EVA+ comes in 4 different colors:

Black

Blue

White (Raw)

Pink

Filament Specs.		Typical Value
Size		2.85 mm
Tolerance		+/- 0.10 mm
Physical		Typical Value
Density		0.923 g/cc
Melt Mass-Flow Rate		2.16 kg/10 min
Hardness		Typical Value
Durometer Hardness (Shore D)		50
Durometer Hardness (Shore A)		95
Mechanical		Typical Value
Tensile Strength at Yield		1028 psi
Tensile Strength at Break		955 psi
Tensile Strength at 100%		1011 psi
Elongation at Yield		130%
Elongation at Break		144%
Flexural Mod (PSI)		2.7
Flexural Mod (MPa)		1.4
